

Welcome to Butler Amusements, Inc. We hope that your visit to the midway will be a memorable one, and we want to ensure that all our guests receive the best possible service during their stay, including the physically challenged. In an effort to make your stay more enjoyable, we have prepared this guide to assist you during your visit.

Should you have any questions or special concerns, we invite you to first stop by Butler Amusements midway office and we will do our best to assist you.

Safety and Accessibility:

It is the position of Butler Amusements, Inc. that the safety and well-being of each one of our guests is our primary concern. Each of our rides incorporates safety features in its design. However, the rider must be aware that he or she also plays a role to ensure his or her own safety. Safety devices, such as lap bars or harnesses, must be securely fastened throughout the ride.

Safety First:

With safety as our first priority, we may restrict certain rides to guests whose safety may be compromised as a result of not doing so. Just as we place height restrictions on certain rides, we may place additional requirements on any ride to ensure every guest's safety. In imposing any additional requirements, it is our desire to maximize guests' participation without minimizing or compromising safety. Access criteria are based upon any guest's ability to utilize all safety restraints and devices as designed, and to maintain a proper riding posture throughout the course of a ride. All guests should realize that, however remote, there is always the possibility that an emergency situation might occur which could necessitate evacuation from a ride or ride area. This may require the rider to physically remove himself from a ride. These conditions are rare. However, guest should be aware of this and exercise good judgment before boarding. Therefore, in general, each guest must be able to board and exit each ride by himself or with the assistance of a capable companion, including in the event of an emergency.

Special Instructions:

1. Guests must be capable of lifting themselves from their wheelchairs onto or off of the ride or must be aided by an adult companion capable of lifting the disabled guest from the wheelchair. Butler Amusements, Inc. personnel are neither trained nor permitted to assist disabled guests other than by helping to steady or support the guest or by aiding the guest's companion.
2. Wheelchair guests, with up to two companions, will be allowed to ride without waiting in line. Please have a member of your party contact the ride operator upon arrival at the ride for further instructions.
3. When sight-impaired guest are riding attractions, someone in the guest's party must say with the guide dog, if applicable. Butler Amusements, Inc. personnel cannot care for nor e responsible for the guide dog.

Rides:

Most of the children's rides throughout the kiddie area are easily accessible to all guests, unless otherwise listed, and are served for guests 54" and under.

Butler Amusements, Inc. is continually adding new spectacular and major ride to the show. The following is the most current list of these rides with a description of what to expect. If the ride you are interested in is not listed, please check with our on-site midway office.
