During the last 30 days, these animals have neither been exposed to VS nor located within an area where VS has been diagnosed."**
- B. Vaccinate all horses coming to the EISF against the Equine Herpes Virus (Rhino). A 2-way vaccine is available that is inexpensive and effective. Pneumabort K is one example that has proven to help prevent the neurological form of this disease. The vaccine does not provide 100% immunity but will provide a degree of protection from the virus.
- C. Due to the risk of spreading equine-related diseases, the temperature of all horses **MUST** be taken twice (2) daily beginning three (3) days prior to entering the fairgrounds. If a horse has an elevated temperature of 101.5 degrees or greater, a veterinarian should be contacted before bringing the horse to the EISF.
